## **STRUCTURING YOUR ATTORNEY FEES**

Since we work closely with so many attorneys, we recognize the importance of helping you achieve your goals - for your clients and for your practice. As a personal injury attorney, you are already familiar with the benefits that a structured settlement provides your clients, and that is why we offer the benefit of structuring your legal fees over time, with guaranteed payments and tax advantages that continue year after year.

### **Periodic Payments Utilizing Structured Settlements Ensure That The Money Will Be Available For Your Future Financial Needs.**

#### **Create a Supplemental Retirement Income Stream**

Through a structured settlement, you are able to defer income until a predetermined future time. Not only can this deferral reduce your current taxable income, it also offers a secure way to set aside income for your future needs, such as those you'll have in retirement. By using a structured settlement you can:

- Choose when your payments will begin at the time of settlement; you do not have to wait until age 59 for payments to start.
- Set up future lump sums to cover large anticipated expenses.
- Have the option to choose guaranteed payment periods as well as lifetime or joint and survivor options.
- Spread fees over several years which may avoid a higher marginal tax bracket and allows the money saved (on taxes) to be invested at little or no risk with no money management fees.
- Defer all or any portion of your fee derived from a qualified structured settlement.
